TR87

1980

1. Biological effects of electric and magnetic fields associated with ELF communications systems, by James D. Grissett. IEEE Proceedings 68, No. 1 (1980), 98-104.

2. Biological effects of 60-Hz electric fields on miniature swine: exposure facility, by W. T. Kaune et al. IEEE Transactions on Power Apparatus and Systems PAS-99, No. 1, 120-128.

3. Biomedical effects associated with energy transmission systems: effects of 60 Hz electric fields on Circadian and Ultradian physiological and behavioral functions in small rodents, by C. F. Ehret et al. Argonne: Argonne National Laboratory, 1980. 80 pp.

4. Cardiovascular response of rats exposed to 60 Hz electric fields, by D. I. Hilton and R. D. Phillips. Bioelectromagnetics 1, No. 1 (1980), 55-64.

5. Chronic exposure to a 60-Hz electric field: effects on synoptic transmission and peripheral nerve function in the rat, by R. A. Jaffe et al. Bioelectromagnetics 1 (1980), 131-147.

6. Comparison of the coupling of grounded humans, swine and rats to vertical, 60 Hz electric fields, by W. T. Kaune and R. D. Phillips. Bioelectromagnetics 1, No. 2 (1980), 117-129.

7. Do high-voltage overhead lines affect the health of residents? by A. F. Koopman. Elektrotechniek (Netherlands) 58, No. 6 (1980), 379-382.

8. The effect of air ionization, electric fields, atmospherics and other electric phenomena on man and animal, by F. G. Sulman. Springfield: Charles C. Thomas, 1980. 389 pp.

9. The effect of electric and magnetic fields near an HVDC converter terminal on implanted cardiac pacemakers, by the IIT Research Institute. Palo Alto: Electric Power Research Institute, 1980. 90 pp.

10. Electric and magnetic fields produced by transmission systems: description of phenonema, by the CIGRE Working Group 36.01 (Interference and Fields). Paris: International Conference on Large High Voltage Electric Systems, 1980. 139 pp.

11. Electrical fields, calcium gradients, and cell growth, by Kenneth R. Robinson and Colin McCaig. Annals of the New York Academy of Sciences 339 (1980), 132-138.

12. Electrical wiring configurations and childhood leukemia in Rhode Island, by John P. Fulton et al. American Journal of Epidemiology III, No. 3 (1980), 292-296.

13. Impact analysis of electrical transmission lines, by W. P. Kellough. Right of Way, Dec. 1980, 19-25.

14. An interview with Dr. Valery Popkov, member of the Soviet Academy of Sciences, discussing the need for 1,150 kV transmission lines in the Soviet Union and "false alarms" about electric fields. Translated from Vi i Vattenfall 33, no. 8 (1980).

15. Long-term biological effects of very intense 60 Hz electric field on mice, by Wagih Z. Fam. IEEE Transactions on Biomedical Engineering BME-27, No. 7 (1980), 376-381.

16. Nonionizing electromagnetic radiation safety: a program of coordinated federal activities related to biological effects of nonionizing electromagnetic radiation (0-300 GHz), by the Interagency Task Force on Biological Effects of Nonionizing Electromagnetic Radiation. Washington: National Telecommunications and Information Administration, 1980. 75 pp.

17. Power frequency electric field induces biological changes in successive generations of mice, by A. A. Marino et al. Experientia 36 (1980), 309-311.

18. A study of farm animals near 765 kV transmission lines, by Harold E. Amstutz and David B. Miller. New York: American Electric Power Service Corporation, 1980. 31 pp.

19. A study of possible effects of high-intensity 60 Hz electric fields on primate behaviour, by C. S. Feldstone and R. J. Spiegel. IEEE Region V Conference Digest (1980), 21-24.

20. What are the effects of electrical and magnetic fields on man? by Jean Cabanes. (Paper given at a joint meeting of CIGRE Study Committees 23 and 36, Madrid 1979.) Revue Generale d'Electricite 89, No. 1 (1980), 16-22.

1981

21. Analysis of structural chromosome changes and SCE after occupational long-term exposure to electric and magnetic fields from 380 kV systems, by M. Bauchinger et al. Radiation and Environmental Biophysics 19 (1981), 235-238.

22. Biological action of 50 Hz electric field on human organism, by T. V. Kalyada et al. Translated from the Russian by Leo Kanner Associates for Bonneville Power Administration, 1981. Source not given. 7 pp.

23. Biological effects of a 765 kV transmission line: exposures and thresholds in honeybee colonies, by B. Greenberg, V. P. Bindokas and J. R. Gauger. Bioelectromagnetics 2, No. 4 (1981), 315-328.

24. Biological effects of chronic exposure of three generations of miniature swine to 60-Hz electric fields, by R. D. Phillips. Richland: Battelle Pacific Northwest Laboratories, 1981. 5 pp.

25. Biological effects of electric and magnetic fields: summary of a literature study, by Magne Waskaas. Norway: State Institute of Radiation Hygiene, 1981. 44 pp.

26. Biological effects of electric fields: EPRI's role, by Robert Kavet. Symposium on Biological Effects of Electric Fields, Palo Alto, 15-16 Sept. 1981, sponsored by EPRI and IERE. 7 pp.

27. Biological effects of high-strength electric fields on small laboratory animals: interim report October 1, 1979-March 31, 1981, by R. D. Phillips. Richland: Battelle Pacific Northwest Laboratory, 1981.

28. Biological influences of power frequency electric fields: a tutorial review from a physical and experimental viewpoint, by Jack E. Bridges and Maurline Preache. IEEE Proceedings 69, NO. 9 (1981), 1092-1120.

29. Comparative danger of different kinds of current, by V. I. Shchutskii, A. I. Sidorov and Yu V. Sitchukhin. Electric Technology USSR 4 (1981), 109-114.

30. ELF electric field coupling to dielectric spheroidal models of biological objects, by Yih Shiau et al. IEEE Transactions on Biomedical Engineering BME-28, No. 6 (1981), 429-437.

31. The effects of high-voltage transmission lines on honey bees, by Bioconcern. Palo Alto: Electric Power Research Institute, 1981. 68 pp.

32. The electric field effects of overhead powerlines on humans and animals in the Netherlands, by A. H. E. Manders and N. S. van Nielen. Elektrotechniek (Netherlands) 59, No. 7 (1981), 438-449.

33. Electric field research continues. EPRI Journal May 1981, 34-35.

34. Electrical and magnetic fields: effects, dangers and protective measures, by H. H. Egyptien. Elektrotechnische Zeitschrift 102, No. 16 (1981), 877-878. (translated from the German)

35. Environmental power-frequency magnetic fields and suicide, by F. Stephen Perry et al. Health Physics 41 (1981), 267-277.

36. Equivalence criteria among man and animals in experimental investigations of high voltage power frequency exposure hazards, by F. Lattarulo and G. Mastronardi. Applied Mathematical Modelling 5, No. 2 (1981), 92-96.

37. General properties of the interaction between animals and ELF electric fields, by William T. Kaune and Murlin F. Gillis. Bioelectromagnetics 2 (1981), 1-11.

38. Interactive effects in 60 Hz electric field exposure systems, by William T. Kaune. Bioelectromagnetics 2 (1981), 33-50.

39. Numerical determination of induced currents in humans and baboons exposed to 60-Hz electric fields, by Ronald J. Spiegel. IEEE Transactions on Electromagnetic Compatibility EMC-23, No. 4 (1981), 382-390.

40. Prolonged exposure of mice to 340 KV/m electrostatic field, by Wagih Z. Fam. IEEE Transactions on Biomedical Engineering BME-28, No. 6 (1981), 453-59.

41. Purkinje nerve cell changes caused by electric fields: ultrastructural studies on long-term effects on rabbits, by H. A. Hansson. Medical Biology (Finland) 59, No. 2 (1981), 103-110.

42. Response of honey bees, apis mellifera L. to high-voltage transmission lines, by Bernard Greenberg, Vytautas P. Bindokas, Marvin J. Frazier and James R. Gauger. Environmental Entomology 10 (1981), 600-610.

43. Transmission line electric fields in the agricultural animal environment, by J. M. Lee and G. L. Reiner. Paper presented at the winter meeting of the American Society of Agricultural Engineers, Chicago, Dec. 15-81, 1981.

44. Transmission lines and the environment: papers presented at the CIGRE Symposium, Stockholm, 23-25 June 1981.

1982

45. Airborne biological particles and electric fields, by William S. Benninghoff and Anne S. Benninghoff. Radio Science 17, no. 5S (1982), 13S-15S.

46. Bioelectric considerations in the design of high-voltage power lines, by Maria Reichmanis and Andrew A. Marino. Journal of Bioelectricity 1, no. 3 (1982), 329-338.

47. Bronchomotor responses of isolated sheep airways to electrical field stimulation, by J. R. Sheller and K. L. Brigham. Journal of Applied Physiology: respiratory, environmental and exercise physiology 53, no. 5 (1982), 1088-93.

48. Cancer and alternating magnetic field exposure, by N. Wertheimer. Paper presented at the 148th National Meeting of the American Association for the Advancement of Science, 1982. Abstract only.

49. Carcinogenesis and exposure to electrical and magnetic fields, by R. P. Liburdy. New England Journal of Medicine 307, No. 22 (1982), 1402. Letter.

50. Colloquium on "Some Biological Effects of Electric and Magnetic Fields", held on Wednesday, 26 May 1982. London. The Institution of Electrical Engineers, 1982.

51. Development of field-mill instruments for ground-level and above-ground electric field measurement under HVDC transmission lines, by P. Sarma Maruvada, R. D. Dallaire and R. Pedneault. IEEE Power Engineering Society Summer Meeting 1983, paper 82SM404-2.

52. ELF communications system ecological monitoring program, annual report for aquatic ecosystems: tasks 5.8, 5.9, 5.10, (effects on stream ecosystems), by Thomas T. Burton et al East Lansing: Michigan State University, 1982.

53. Effect of disturbances on the geomagnetic field on the Circadian rhythm of physiological functions, by G. V. Ryzhikov, V. A. Kuzmenko, and A. B. Buluev. Human Physiology (English translation of Fiziologiya Cheloveka) 8, no. 2 (1982), 87-93.

54. The effect of electric field induced perturbation of the distribution of ions near the cell surface on migration of charged membrane components, by James R. Rabinowitz. Journal of Theoretical Biology 99 (1982), 377-389.

55. Effects of ELF fields on calcium-ion efflux from brain tissues in vitro, by C. F. Blackman et al. Radiation Research 92 (1982), 510-520.

56. Effects of electric fields near power-transmission plant, by J. A. Bonnell. Journal of the Royal Society of Medicine 75 (1982), 933-941.

57. The effects of electric fields on the organism of persons in the proximity of power transmission equipment at a voltage of 400 kV or higher, by J. Tuhackova and V. Cenkova. Electra 83 (1982), 111-117.

58. Effects of electromagnetic fields associated with electricity production and distribution: an assessment of present knowledge, by J. A. Bonnell. UNIPEDE paper No. 90.1 (June 1982). 13 pp.

59. Effects of high-intensity power-frequency electric fields on implanted modern multiprogrammable cardiac pacemakers, by D. G. Barton et al. Journal of the Royal Society of Medicine 75 (May 1982), 327-331.

60. Effects of high-intensity 60 Hz fields on bone growth, by Cedric F. Walker et al. Journal of Bioelectricity 1, no. 3 (1982), 339-349.

61. Effects of high voltage power lines on health: results from a systematic survey of a population sample along the ±400 kV DC Pacific Intertie, by J. R. Nolfi and R. C. Haupt. Montpelier: Associates in Rural Development, Inc., 1982.

62. Effects of induced electromagnetic field on hormonal responsiveness of osteoblasts, by R. A. Luben and C. D. Cain. 183rd American Chemical Society National Meeting, March 28 - April 2, 1982. American Chemical Society Abstracts of Papers 183 (1982), COLL-15.

63. Effects of magnetic field exposure on fertilization success of rainbow-trout, salmo-gairdneri, by J. A. Strand et al. Presented at the 3rd Annual Meeting of the Bioelectromagnetic Society, August 10-12, 1981. Richland: Battelle Pacific Northwest Laboratory, 1981.

64. Effects of nonionizing electromagnetic radiation. Foreign Broadcast Information Service USSR Report: Life sciences 25 October 1982.

65. The effects of phase shifts in a 10 Hz electric field cycle on locomotor activity rhythm of drosophila melanogaster, by Harold Dowse. Journal of Interdisciplinary Cycle Research 13, no. 4 (1982), 257-264.

66. Electric fields induced by EHV transmission over irregular terrain, by H. M. Sendaula, et al. IEEE Power Engineering Society Summer Meeting 1982, paper 82 SM 477-8.

67. Electrical and biological effects of transmission lines: a review, by Jack M. Loe et al. Portland: Bonneville Power Administration, 1982. 93 pp.

68. Electrical environmental regulations of overhead transmission lines. Gaithersburg: Shah & Associates, 1982. 66 pp.

69. Electromagnetic field exposure and cancer: a commentary from EPRI, by Leonard A. Sagan. Palo Alto: EPRI, 1982. 12 pp.

70. Electromagnetism and life, by R. O. Becker and A. A. Marino. Albany: State University of New York Press, 1982. 211 pp.

71. Germination and growth of a vegetable exposed to very severe environmental conditions experimentally induced by high voltage, by Takaski Aoki and Shunjiro Ikezawa. Japanese Journal of Applied Physics 21, no. 9 (1982), 1373-1378.

72. A health and safety evaluation of the ± 400 kV powerline: executive summary and minority report, by the Science Advisors to the Minnesota Environmental Quality Board. St. Paul (Minnesota), 1982.

73. Laboratory studies on animals and human beings exposed to 50 Hz electric and magnetic fields, by R. Sander, J. Brinkman and B. Kuehne. CIGRE Proceedings 1982, paper No. 36-01. 6 pp.

74. Leukaemia in workers exposed to electrical and magnetic fields, by W. E. Wright et al. Lancet II, No. 8308 (1982), 1160-1161. Letter.

75. Local geo-electric fields at the bottom of the sea and their relevance for electrosensitive fish, by N. Pals, R. C. Peters and A.A.C. Schoenhage. Netherlands Journal of Zoology 32, no. 4 (1982), 479-494.

76. Measurement of induced electric fields in a phantom model of man, by Kun-Mu Chen, S. Rukspollmuang, and D. P. Nyquist. Radio Science 17, no. 5S (1982), 49S-59S.

77. Mortality from leukemia in workers exposed to electrical and magnetic fields (letter to the editor), by S. Milham. New England Journal of Medicine 307, No. 4 (1982), 249.

78. The nature of exposure to low frequency electric fields near electric power transmission plant, by J. C. Male and W. T. Norris. Colloquium on "Some Biological Effects of Electric and Magnetic Fields" 1982, 4/1-10.

79. Neutral-to-earth voltage and ground current effects in livestock facilities, by R. J. Gustafson and V. D. Albertson. IEEE Transactions on Power Apparatus and Systems PAS-101, No. 7 (1982), 2090-2095.

80. Nonionizing radiation protection, edited by Michael J. Suess. Copenhagen: World Health Organization, 1982.

81. Orientation reactions of the dogfish, scyliorhinus canicula, to local electric fields, by N. Pals, P. Valentijn and D. Verwey. Netherlands Journal of Zoology 32, no. 4 (1982), pp. 495-512.

82. Pigs fare well under 345 kV line, by Aly A. Mahmoud and Dean Zimmerman. Transmission & Distribution 34, no. 12 (1982), 28-30.

83. Redistribution of dissolved oxygen concentration under strong dc magnetic fields, by Shoogo Ueno. IEEE Transactions on Magnetics MAG-18, no. 6 (1982), 1704-1706.

84. Source book: biological effects of transmission lines, by Sigma Associates. Minneapolis: Mid-Continent Area Power Pool (MAPP), 1982. (Summarizes 64 studies.)

85. Static electric and electromagnetic low-frequency fields (biological effects and hygienic assessment) by B. I. Davydov and V. N. Karpov. Kosmicheskaya Biologiya I Aviakosmicheskaya Meditsina 16, no. 5 (1982), 18-23. (Translated into English.)

86. Subjective response to negative air ion exposure, by L. W. Buckalew and A. Rizzuto. Aviation, Space, and Environmental Medicine 53, no. 8 (1982), 822-823.

87. Thermal aspects of biologic effects of electromagnetic fields at the cellular and molecular level, by Andre-Jean Berteaud. Progress in Clinical and Biological Research 107: Biomedical thermology (1982), 197-208.

88. Underground electric power transmission system environmental impact assessment, by Dames and Moore. Washington: USDOE, 1982.

89. The U.S. Department of Energy 60 Hz electric fields bioeffects research, by A. O. Bulawka et al. IEEE Power Engineering Society Winter Meeting 1982, paper 82 WM 220-2. 9 pp.

1983

90. Analysis of air ions in biological exposure systems, near HVdc electric power transmission lines, in rooms containing ion generators, and near exposed humans and animals, by William T. Kaune, Murlin F. Gillis and Richard J. Weigel. Journal of Applied Physics 54, no. 11 (1983), 6274-6283.

91. Analysis of electric and magnetic fields measured near TVA's 500 kV transmission lines, by Musoke Sendaula et al. IEEE Power Engineering Society Summer Meeting 1983, paper 83 SM463-7.

92. Behaviour of erythrocytes in high gradient magnetic field, by A. N. Shalygin, S. B. Norina, and E. I. Kondorsky. Journal of Magnetism and Magnetic Materials 31-34 (1983), 555-556.

93. Bioelectric properties of frog sciatic nerves during exposure to stationary magnetic fields, by C. T. Gaffey and T. S. Tenforde. Radiation and Environmental Biophysics 22 (1983), 61-73.

94. Biological effects from exposure to transmission line electromagnetic fields, by Morton W. Miller. Right of Way 30, no. 3 (1983), 8-15.

95. Biological effects from high-voltage transmission lines: research guidance, by the Aerospace Corporation. Washington: U. S. Office of Energy Systems Research, 1983. DOE/CE/76007-1.

96. Biological effects of electromagnetic fields on vertebrates: a review, by B. Algers and K. Hennichs. Veterinary Research Communications 6, no. 4 (1983), 265-79.

97. Biological effects of high voltage AC transmission lines: with reference to the Colstrip Project, Garrison-Spokane HVTL, by A. R. Sheppard. Redlands: Montana Dept. of Natural Resources and Conservation, 1983.

98. Biological implications of electric field effects. VI. Fusion of mouse blastomeres without and within Zona Pellucida, by H. Berg, A. Kurischko and R. Freund. Studia Biophysica 94 (1983), 103-104.

99. Cell surface effect of 60-Hz electromagnetic fields, by M. T. Marron, B. Greenebaum, J. E. Swanson and E. M. Goodman. Radiation Research 94, no. 1 (1983), 217-220.

100. Changes in cell shape and actin distribution induced by constant electric fields, by Paul W. Luther, H. Benjamin Peng and Jim Jung-Ching Lin. Nature 303, no. 5 (1983), 61-64.

101. Changes of extracellular potassium activity induced by electric current through brain tissue in the rat, by A. R. Gardner-Medwin and C. Nicholson. Journal of Physiology 335 (1983), 375-392.

102. Commentary: somatosensory evoked potentials and magnetic fields, by H. Stowell. International Journal of Neuroscience 18, no. 1-2 (1983), 73-86.

103. Comments on "Environmental Power-Frequency Magnetic Fields and Suicide" and replies: four letters to the editor. Health Physics 44, no. 6 (1983), 697-700.

104. Criteria for electric field bioeffects investigations and risk assessment, by Sol M. Michaelson. Presented at the 1983 IEEE-ESMO Conference, Atlanta, Georgia, 9 June 1983.

105. Do electric fields favourably affect nerve regeneration after injury? by R. W. Ziegenbein et al. Abstracts of the 3rd meeting of the Australian Neuroscience Society, Melbourne, Feb. 2-4, 1983 Neuroscience Letters Supplement II (1983), S86.

106. Effects of an artificial magnetic field on serotonin N-acetyltransferase activity and melatonin content of the rat pineal gland, by H. A. Welker et al. Experimental Brain Research 50 (1983), 426-432.

107. The effects of direct-current magnetic fields on turtle retinas in vitro, by Michael S. Raybourn. Science 220 (1983), 715-717.

108. Effects of ELF electric fields on the isolated frog heart, by David A. Kloss and Edwin L. Carstensen. IEEE Transactions on Biomedical Engineering, vol BME-30, no. 6 (1983), 347-348.

109. The effects of electricity on mutation in Escherichia coli, by H. W. Ellis and D. Savva. Microbios Letters 22 (1983), 67-70.

110. Electric field effects on bacteria and yeast cells, by H. Hulsheger, J. Potel and E. G. Niemann. Radiation and Environmental Biophysics 22 (1983), 149-162.

111. Electric field health studies, by Robert Kavet. 54th Annual MVEA Engineering Conference, April 5-7, 1983.

112. Electric fields and ion currents of a ±400 kV HVDC test line, by G. B. Johnson. IEEE Power Engineering Society Winter Meeting 1983, paper 83 WM 165-8.

113. Electrical stimulation causes endothelium-dependent relaxation in lung vessels, by Gerard W. Frank and John A. Bevan. American Journal of Physiology 244, no. 6 (1983), H793-798.

114. Electromagnetism and cancer (editorial). The Lancet Jan 29, 1983, p. 224.

115. Environmental studies of a 1100 kV prototype transmission line, by L. E. Rogers. Performed by Battelle Pacific Northwest Laboratories for the Bonneville Power Administration. Montreal: Canadian Electrical Association, 1983. CEA Project 78-95.

116. Extremely low frequency electromagnetic emissions from video display terminals and other devices, by M. A. Stuchly, D. W. Lecuyer and R. D. Mann. Health Physics 45, no. 3 (1983), 713-722.

117. Food consumption, water intake and growth data on rats chronically exposed to a high-intensity 60-Hz field, by Y. J. Seto et al. Journal of Bioelectricity 2, nos. 2 & 3 (1983), 197-205.

118. Garrison-Spokane 500-kV transmission project: final environmental impact statement, by the Bonneville Power Administration. 2 vols. Missoula (Montana), 1983.

119. Geophysical variables and behavior: XI. Open field behaviors in young rats exposed to an ELF rotating magnetic field, by Klaus-Peter Ossenkopp and Margitta D. Ossenkopp. Psychological Reports 52 (1983), 343-349.

120. Health effects of ionizing radiation in the low-dose range, by Evelyn A. Mauss. Annals of the New York Academy of Sciences 403 (1983), 27-36.

121. Health risks from electricity generation, by Bernard L. Cohen. Comments on Molecular and Cellular Biophysics, vol. 2, part 1 (1983) p. 1-15.

122. Hematologic and serum chemistry studies in rats exposed to 60-Hz electric fields, by H. A. Ragan et al. Bioelectromagnetics 4, no. 1 (1983), 79-90.

123. Homing behaviour of pigeons released after having been placed in an alternating magnetic field, by F. Papi, E. Meschini and N. E. Baldaccini. Comparative Biochemistry and Physiology 76, no. 4 (1983), 673-682.

124. Human reactions to ELF electric and magnetic fields: an annotated bibliography of current literature, by J. Patrick Reilly. 3rd ed. Laurel: Johns Hopkins University, Applied Physics Laboratory, 1983.

125. The influence of electric field exposure on bone growth and fracture repair in rats, by B. J. McClanahan and R. D. Phillips. Bioelectromagnetics 4, no. 1 (1983), 11-19.

126. Influence of low magnetic-field-strength variations on the retina and pineal gland of quail and humans, by G. Cremer-Bartels, K. Krause and H. J. Kuchle. Graefe's Archive for Clinical and Experimental Opthalmology 220 (1983), 248-252.

127. Interference with the pacemakers of two workers at electricity substations, by G. S. Butrous et al. British Journal of Industrial Medicine 40 (1938), 462-465.

128. Is there a need for the Commission to reconsider its decision to allow an electric field of 1.6 kV/m at the edge of rights-of-way in New York, and should the Commission now consider setting a standard for edge-of-right-of-way magnetic field strength? by Steve Eabry. New York: Dept. of Public Service, 1983.

129. Leukaemia incidence in electrical workers, by Michael Coleman, Janine Bell and Richard Skeet. The Lancet, April 30, 1983, 982-983.

130. Leukaemia mortality in electrical workers in England and Wales, by Michael E. McDowall. The Lancet Jan 29, 1983, p. 246.

131. Light-weight battery-operable orthopaedic stimulator for the treatment of long-bone nonunions using pulsed magnetic fields, by J. Watson. Medical & Biological Engineering & Computing 21 (1983), 509-510.

132. Magnetic field effects on calcium efflux and insulin secretion in isolated rabbit islets of Langerhans, by Weldon B. Jolley et al. Bioelectromagnetics 4, no. 1 (1983), 103-106.

133. Measurements of electric and magnetic fields in and around homes near a 500 kV transmission line, by R. J. Caola, D. W. Deno and V. S. Dymek. IEEE Power Engineering Society Winter Meeting 1983, paper 83 WM 164-1.

134. Neurobiological investigations on the magnetic sensitivity of the pineal gland in rodents and pigeons, by P. Semm. Comparative Biochemistry and Physiology 76A, no. 4 (1983), 683-689.

135. On the mechanism of 60-Hz electric field induced effects in Pisum sativum L. roots: vertical field exposures, by Morton W. Miller et al. Radiation and Environmental Biophysics 22 (1983), 293-302.

136. Possible adaptation to strong magnetic fields, by Z. N. Nakhilnitskaya et al. Acta Astronautica 10, no. 3 (1983), 159-161.

137. Preferred and alternate routes for the Bonneville Power Administration's 500-kV transmission line from Garrison West: final report. Helena: Montana Dept. of Natural Resources and Conservation, 1983.

138. The public health implications of HVDC transmission lines: an assessment of the available evidence, by R. S. Banks and A. N. Williams. IEEE Power Engineering Society Winter Meeting 1983, paper 83 WM 167-4.

139. Reduced mitogenic stimulation of human lymphocytes by extremely low frequency electromagnetic fields, by Pio Conti et al. FEBS Letters 162, no. 1 (1983), 156-160.

140. Relationship between field strength and arousal response in mice exposed to 60-Hz electric fields, by R. S. Rosenberg, P. H. Duffy, G. A. Sacher and C. F. Ehret. Bioelectromagnetics 4, no. 2 (1983), 181-191.

141. Reproductive and growth performance of swine under 345 kV transmission lines, by Dean R. Zimmerman and Aly A. Mahmoud. American Power Conference Apr. 1983.

142. Reproductive hazards among workers at high voltage substations, by S. Nordstrom, E. Birke and L. Gustavsson. Bioelectromagnetics 4, no. 1 (1983), 91-101.

143. 60-Hz electric field alters the steroidogenic response of rat adrenal tissue, in vitro, by John R. Lymangrover, Emmanuel Keku and Y. Jo Seto. Life Sciences 32 (1983), 691-696.

144. 60 Hz ultra-high voltage electric field effect on onion root mitotic index: a lack of impact, by Richard W. Greene. Environmental and Experimental Botany 23, no. 4 (1983), 355-360.

145. A statistical/epidemiological study of bovine performance associated with the CPA/UPA DC power line in Minnesota: final report, by Frank B. Martin et al. St. Paul: Minnesota Environmental Quality Board, 1983.

146. Stimulation and inhibition of acid secretion by electrical field stimulation in the rat isolated stomach, by J. Wilkinson. Journal of Physiology 341 (1983), 67P-68P.

147. Stimulation of a Quabain-sensitive Rb+ uptake in human erthrocytes with an external electric field, by Engin H. Serpersu and Tian Yow Tsong. The Journal of Membrane Biology 74 (1983), 191-201.

148. Study of the behavioural and biological effects of high-strength 60 hz electric fields, by the Southwest Research Institute. Washington: U. S. Dept. of Energy, 1983.

149. Technical note: On changes in evaporative heat loss that result from exposure to nonionizing electromagnetic radiation, by E. R. Adair, D. E. Spiers, J.A.J. Stolwijk, and C. B. Wenger. Journal of Microwave Power 18 (1983), no. 2, pp. 209-210.

150. Transmission line electric fields and the possible effects on livestock and honeybees, by J. M. Lee and G. L. Reiner. Transactions of the ASAE Jan/Feb 1983, 279-286.

151. Variables in research involving electromagnetic bioeffects: letter to the editor, by Robert O. Becker. Journal of Bioelectricity 2, nos. 2 and 3 (1983), 213-216.

152. Weak electric fields affect plant development, by Andrew A. Marino, Francis X. Hart and Maria Reichmanis. IEEE Transactions on Biomedical Engineering vol. BME-30, no. 12 (1983), 833-834.

1984

153. The effects of high voltage transmission lines on the health of adjacent resident populations, by Roy C. Haupt and James R. Nolfi. American Journal of Public Health 74, no. 1 (1984), 76-78.

154. Effects of physical forces on the reproductive cycle, by the American Medical Association's Council on Scientific Affairs. Journal of the American Medical Association 251, no. 2 (Jan 13, 1984), 247-251.

155. Measurements of transmission line electric fields in a residential environment, by P. D. Jacobs and F. M. Dietrich. IEEE Power Engineering Society Winter Meeting 1984, paper 84WM087-3.

156. Method for evaluating human exposure to 60 Hz electric fields, by Don W. Deno and Mike Silva. IEEE Power Engineering Society Winter Meeting 1984, paper 84WM090-7.

157. Special report: EM hazards: the drive to regulate electromagnetic fields, by Eric J. Lerner. IEEE Spectrum 21, no. 3 (1984), 63-70.

158. Special report: health effects: biological effects of electromagnetic fields, by Eric J. Lerner. IEEE Spectrum 21, no. 5 (1984), 57-69.

159. Status of research on biological effects of transmission line electric and magnetic fields, by Jack M. Lee, Jr. Right-of-Way February 1984, 4-11.

160. Tales of power: electric fields are everywhere, silent and invisible, but their effects may be all too real, by Scott Forslund. Pacific Northwest April 1984, 33-34, 36, 65.

ORGANIZATION AND CONFERENCE INDEX

Aerospace Corporation 95
American Association for the Advancement of Science
148th National Meeting 1982 48
American Chemical Society National Meeting 1982 62
American Electric Power Service Corpration 18
American Medical Association Council on Scientific Affairs 154
American Society of Agricultural Engineers 43, 150
American Power Conference 1983 141
Argonne National Laboratory 3
Associates in Rural Development Inc. 61
Australian Neuroscience Society 3rd Meeting 1983 105
Battelle Pacific Northwest Laboratories 24, 27, 63, 115
Bioconcern 31
Bioelectromagnetic Society 3rd Annual Meeting 1981 63
CIGRE Study Committees 23 and 36 20
CIGRE Symposium on Transmission Lines and the Environment 44
CIGRE Working Group 36.01 (Interference and Fields) 10
Canadian Electrical Association 115
Colloquium on "Some Biological Effects of Electric and
Magnetic Fields", IEE, 1982 50,78
Dames & Moore 88
Electric Power Research Institute 9, 26, 31, 33
Foreign Broadcast Information Service 64
IEEE Power Engineering Society Summer Meeting 1983 51, 91
IEEE Power Engineering Society Winter Meeting 1982 89
IEEE Power Engineering Society Winter Meeting 1983 112, 133, 138
IEEE Power Engineering Society Winter Meeting 1984 155, 156
IEEE Region V Conference 19
IEEE-ESMO Conference 1983 104
IIT Research Institute 9
Institution of Electrical Engineers 50
Interagency Task Force on Biological Effects of Nonionizing
Electromagnetic Radiation 16
John Hopkins University Applied Physics Laboratory 124
Leo Kanner Associates 22
MVEA Engineering Conference, 54th Annual, 1983 111
Michigan State University 52
Mid-Continent Area Power Pool (MAPP) 84
Minnesota Environmental Quality Board 72, 145
Montana Dept. of Natural Resources & Conservation 97, 137
New York Dept. of Public Service 128
Norway State Institute of Radiation Hygiene 25
Shah & Associates 68
Sigma Associates 84
Southwest Research Institute 148
Symposium on Biological Effects of Electric Fields 1981 26
UNIPEDE 58
U. S. Bonneville Power Administration 22, 67, 115, 118, 137
U. S. Dept. of Energy 148
U. S. National Telecommunications and Information Administration 16
U. S. Office of Energy Systems Research 95
USSR Report: Life Sciences 64
World Health Organization 80
